AUTOMATION IS THE WAY OF THE FUTURE.
GET THERE WITH LENOVO.

WELCOME TO THE FUTURE.

What if PCs were as easy to deploy as a mobile phone? What if your IT admins didn't have to spend their time on routine, repetitive tasks—and could instead focus on innovative, future-facing work that grows your business? What if your employees could finish their work faster on modern devices?

That vision could be a reality with automated IT solutions from Lenovo and Microsoft®. Save time and money and redirect your IT staff's energy towards more productive work. Whether you're just starting on the path to automation or you already have some solutions in place, Lenovo can help you take the next step on your journey toward greater productivity.

Did you know?

Half of today's work activities could be automated by 2055[1]

69% of knowledge workers say automation will give them more time to do their primary job duties[2]

Knowledge workers spend just 44% of their week performing the primary duties of their job[2]

Lenovo™

AUTOMATING IS AS EASY AS ONE, TWO, THREE...

1 **Get devices up and running sooner with custom provisioning.**

- **Lenovo Ready to Provision (RTP)** and RTP+ custom options configure devices to your exact specifications before they leave the factory, saving IT admin time and speeding up customization. With Ready to Provision Plus, you can add up to five apps of your choice to the image, choose your Microsoft Windows® branch, and opt for encryption. And, for future deployments, Lenovo will update your OS, drivers, and apps.

2 **Keep your mobile workforce secure with remote management tools.**

- **Lenovo Endpoint Management (LEM)**, powered by MobileIron®, unifies cloud and endpoint security across multiple devices. Because it keeps sensitive information private, LEM enables Bring Your Own Device programs and allows IT admins to reach mobile employees while keeping company data secure.

- **Microsoft Azure® Active Directory (AD)** is a cloud-based management solution for handling groups, users, and a company's domain. With Azure AD, IT can streamline identity management and improve security with tools like single-sign on, multi-factor authentication, and self-service password management.

3 - **Microsoft Intune** lets your mobile workforce stay connected—and your company data stay secure. With Microsoft Intune, in-house IT can manage workers' devices and apps and keep them under compliance while protecting valuable data.

Maximize IT admins' productivity with automated deployment.

- **Lenovo Cloud Deploy** enables recovery of images and custom preloads from the cloud and helps IT admins save time on ongoing management tasks. Quick Image, a client-based application, captures, uploads, and downloads an image from a computer's hard drive in real time. And with Cloud Recovery, IT can store custom images in the cloud and access them anywhere, anytime.

- **Microsoft Windows Autopilot** lets IT eliminate imaging and enables users to self-deploy devices from the cloud. This helps bring Lenovo devices under management sooner, freeing up your IT team to tackle big, bold solutions for your company. Lenovo is the first OEM PC partner to support Windows Autopilot.

Accelerate problem-solving with Lenovo Premier Support

Get a direct line to the experts when you most need it. One-on-one support from Lenovo engineers helps you solve problems quicker and get back to doing business sooner.

## Strengthen security with Intel® vPro™ technology

Using Intel AMT, IT admins can manage Intel Core™ vPro processor-based devices remotely, strengthening security and allowing for easier updating and repair. Other enhanced security measures include multi-factor authentication, full disk encryption, and Remote Secure Erase.

Lenovo™

How does automation lead to increased productivity?

With time freed from repetitive deployment and provisioning tasks, your IT staff can funnel energy into strategic projects that grow your business

No more devices sitting unused and unproductive—get your devices under management right out of the box

Set up employees with new devices faster so they can start working sooner

Reach out to your account representative to learn more about productivity solutions for your company.
