

# ThinkPad E16 Gen 4 (AMD)

The ThinkPad delivers enterprise-grade performance for business professionals managing high-demand workloads across travel, office, and hybrid environments. Powered by the AMD Ryzen™ AI 5 / 7 300 Series Processor with integrated AMD Radeon™ 820M/840M/860M graphics, it handles simultaneous applications, video conferencing, large presentations, and document-intensive workflows with consistent responsiveness. Up to 64GB DDR5-5600 memory and up to 1TB SSD storage ensure fast access to critical data at all times. Support for up to 4 independent displays via HDMI® and USB4® ports enables a fully productive multi-screen workspace, whether in the office or on the move.

## Redefining possibilities with powerful performance and groundbreaking on-device AI

Lenovo E series laptops are ideal for buyers seeking an entry-level notebook for handling everyday workloads with ease.

The 16" with up to WQXGA (2560×1600) resolution gives professionals the space and clarity to manage presentations, dashboards, and multiple workflows simultaneously. With 400 nits brightness, content remains clearly visible across office and remote environments, while up to 1200:1 contrast ratio improves readability of dense documents and visuals. Optional AICCP color calibration ensures consistency for client-facing materials, and TÜV Rheinland® Low Blue Light with Eyesafe® Certified 2.0 helps reduce eye strain during extended workdays.

The 2W dual Dolby Atmos® stereo speakers and 360° far-field, smart noise-cancelling dual-microphone array deliver consistent audio performance across client calls, virtual presentations, and cross-functional meetings. The optional FHD 1080p + IR hybrid camera with temporal noise reduction ensures sharp video quality in every interaction, while the integrated privacy shutter provides hardware-level security for sensitive business communications.

Designed with sustainability and efficiency at its core, this ThinkPad laptop meets environmental standards, including ENERGY STAR® 9.0, EPEAT™ Gold, and TCO Certified Generation 10. These certifications ensure optimized energy consumption, helping reduce power costs while lowering environmental impact.
