Lenovo ThinkPad

Thin and light with a 16:10 aspect ratio display and up to 85% screen-to-body ratio for a fuller view, the refined Lenovo ThinkPad T14s Gen 4 combines mobility and performance for ultimate productivity in today's hybrid work environment.

Built with next-generation AMD Ryzen™ PRO processors with 20W thermal design power, plus the latest AMD Radeon™ Graphics and new, faster LPDDR5X memory, this Lenovo ThinkPad speeds through any task with efficiency and confidence. Users can expect a better audio/visual experience, too, with display options up to 2.8K OLED with add-on film touch, a separate 5MP + IR camera option, Dolby® Voice technology, and Low Blue Light technology to alleviate eye fatigue.

This Lenovo ThinkPad also includes industry-leading Lenovo ThinkShield security features, like voice recognition, Power-On Touch Fingerprint Reader, webcam privacy shutter, and ultrasonic human presence detection. These combine with AMD Security, including AMD Memory Guard, for optimized protection against threats, as well as Microsoft Pluton technology built directly into the processor, hardening new Windows 11 PCs with continuous, up-to-date security.

Plus, this device is more environmentally responsible than ever thanks to Lenovo's reduced-emissions manufacturing process, PCC recycled materials, and sustainable packaging with 90% recycled content.
