

Lenovo ThinkPad E14 GEN 2 *i*

Designed for dynamic work styles and modern business requirements and powered by the latest 11th Gen Intel® Core™ processor for top-of-the-line computing, ThinkPad E14 Gen 2 *i* marries performance with style and substance.

True to the ThinkPad brand, it is built with impressive reliability and robust security features. Modern PC innovations like one-touch power on and logins, Modern Standby, and an IR camera¹ give you intuitive user experience. Whether it is design, performance, security, or collaboration, the ThinkPad E14 Gen2 *i* doesn't leave you wanting.

Lenovo

LOOKS GOOD, FEELS BETTER

Work can take you anywhere, and the ThinkPad E14 is made to move—at just 1.5kg, it is light and easy to carry, and at 17.9mm thin, it can fit in your bag when you are on the go. Aluminum top and bottom covers give it a classy look and a nice feel in your hands.

VISUALS THAT SPEAK

Visualize better on an engaging display, with Full-HD resolution and 100% sRGB color gamut¹ that renders crystal clear visuals. Up to 300nits of brightness means you can see your screen even in outdoor environments. The touchscreen¹ display lets you intuitively navigate and interact with your notebook.

SECURE FROM THREATS AND BREACHES

You don't take chances with your security and ThinkPad E14 Gen 2 *i* does not either. A fingerprint reader and IR camera¹ with Windows Hello enable near fool-proof biometric authentication to prevent unauthorized access to your system.

DO MORE WITH SMART FEATURES

AI-based noise cancellation in the embedded microphone enhances meetings. Pick between Private, Shared, or Environmental modes for seamless conferencing in any environment. Dynamic cooling manages the working temperature for optimum performance. And work comfortably for longer with a low blue light mode.

performance

The 11th Gen Intel® Core™ processor provides faster performance to power through tasks, backed by up to 32GB of DDR4 memory and discrete NVIDIA® 450MX graphics.¹

user-experience

Stay productive in Modern Standby mode, get updates, and wake your device with your voice. Smart Power On enables one-touch power on and logins.

connectivity

Thunderbolt™ 4 is the fastest port and capable of supporting up to two 4K displays. Intel® Wi-Fi 6¹ ensures your internet is stable, rapid, and without latency.

¹Optional

11th Gen Intel® Core™ processors

85% screen-to-body ratio (STBR)

Lay-flat screen

Thunderbolt™ 4, full-function USB Type-C, HDMI, and more

Secure IR camera
