

Lenovo ThinkPad E14 GEN 3

A focused, work-oriented laptop made for modern business, E14 Gen 3 is built to be worked on and used all day, every day. Powered by the latest AMD Ryzen™ 5000 Series mobile processors, with the choice of two AMD family offerings to suit any performance requirement. Built with a blend of sharp, minimalist design, MIL-SPEC durability, and precision engineering, E14 Gen 3 is a different class of business laptop.

As a ThinkPad, it is built sturdy and sleek with Aluminum panels on the top and bottom covers. Smart integration of security features ensures the device is a stronghold of sensitive data while not getting in the way of user experience. Lenovo ThinkPad E14 Gen 3 is a great device for any business professional.

Lenovo ThinkPad E14 GEN 3

SIGNATURE LOOKS REFINED

Having a laptop that looks good and feels good is an important part of any purchase decision. E14 Gen 3 carries the ThinkPad legacy, rendering it business-grade in style and features, it is a device that you would want to carry with you everywhere. Aluminum panels on the top and bottom bring the weight, starting at 1.64kg/3.62lbs., and a 17.9mm thickness³ means it is easy to hold or slip into a bag.

MULTIMEDIA EXPERIENCES ELEVATED

Designed to be a daily driver, the visual and aural aspects of this laptop are top-notch. The panel, housed in a narrow-bezel chassis, can be specced up to an FHD IPS display, putting out up to 300nits—perfect in any lighting condition. The display is paired with high-quality HARMAN speakers, so everything is heard clearly.

SECURITY SOLUTIONS ENHANCED

For those working remotely, security is non-negotiable, and the E14 Gen 3 comes with layers of protection. A fingerprint reader¹ built into the power button and an IR camera¹ enables accurate facial recognition so no unauthorized person gains access to the device. ThinkShutter camera cover is a simple, effective way to stay guarded against prying eyes. Firmware-based TPM encrypts data, locking it away.

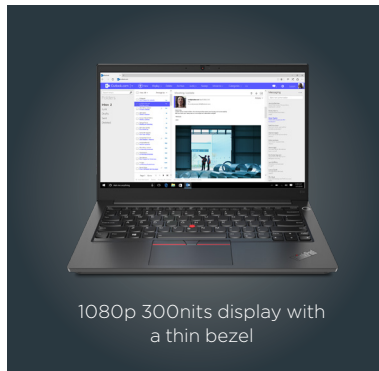

CONFERENCING FEATURES UPDATED

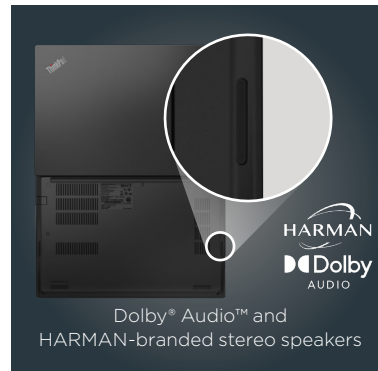

Dual mic arrays and 720p HD camera¹ make meetings seamless—at home, on the move, or in the office. If required, the option to connect headsets through the combo audio jack and up to Bluetooth® 5.2 adds a layer of privacy to office meetings.

Integrated FPR on power button²

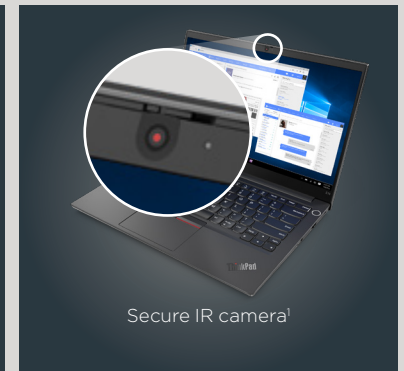

1080p 300nits display with a thin bezel

Dolby® Audio™ and HARMAN-branded stereo speakers

Full-function USB Type-C, HDMI, and more

Secure IR camera¹

performance

AMD Ryzen™ 5000 Series mobile processors with AMD Radeon™ graphics are the world's most advanced laptop processors² with up to 8 processor cores delivering exceptional performance. Up to 24GB of DDR4 3200Mhz memory keeps everything responsive.

user experience

Smart Power On¹ enables one-touch power on and logins for smartphone-like useability. Up to 1.5TB of M.2 SSD with dual SSD option means reading and writing of large files is fast and reliable.

connectivity

A complete set of ports, including legacy ports like USB-A, RJ45, and HDMI, along with a full-function USB-C, and an always-on USB, make connecting to peripherals hassle-free.

¹Optional

²As of December 2020, the Ryzen 5000 series mobile processors are the "Most advanced/powerful mobile processors," defined as the highest-performing single-thread and multi-thread performance available on x86 mobile processors.

³Applicable for metallic version
