DOMINANT PROCESSING TECHNOLOGY

Equipped with the latest AMD Ryzen™ 5000 U-series mobile processors, the ThinkPad E15 Gen 3 delivers benchmark performance¹ in a business PC. Built on the new AMD Zen 3 architecture, the U-series mobile processors lower system latency and accelerate overall computing, so you can power through every task.

ADVANCED USER EXPERIENCE

Get uncompromised visuals on the 1080p IPS² panel that ensures detail and clarity, while up to 300nits of brightness lets you view its contents outdoors or in brightly-lit environments. ThinkPad Glance technology, using the IR camera² for face, eye, and gaze-tracking, offers Snap Window, Presence Detection, and Smart Pointer functions for a seamless navigation experience.

SPLENDID DESIGN

Designed to look the part in any business scenario, the E15 Gen 3 is a professional PC that appeals to the modern workforce thanks to its slim build and Aluminum top cover. It weighs 1.7kg and is only 18.9mm thin, so you can take it anywhere. A screen-to-body ratio of 85% gives you a premium-looking screen without thick bezels to weigh it down. Moreover, the device is MIL-SPEC tested, making it durable and reliable in equal measure.

CONFERENCING FEATURES UPDATED

Dual mic arrays and 720p HD camera¹ make meetings seamless—at home, on the move, or in the office. If required, the option to connect headsets through the combo audio jack and up to Bluetooth® 5.2 adds a layer of privacy to office meetings.

performance

The latest generation AMD Ryzen™ 5000 U-series mobile processors are powerful enough to handle heavy-duty tasks like content creation and graphic design. Dual SSD storage and up to 24GB DDR4 memory ensure lightning-fast responsiveness and a smooth computing experience.

connectivity

A wide array of ports, including HDMI, RJ45, and three USB ports, enable connections to multiple external devices. Adding flexibility and convenience, the full-function USB Type-C offers data, power, video, and audio transfers from a single port. Wi-Fi 6² compatibility ensures a higher network speed and broader bandwidth.

security

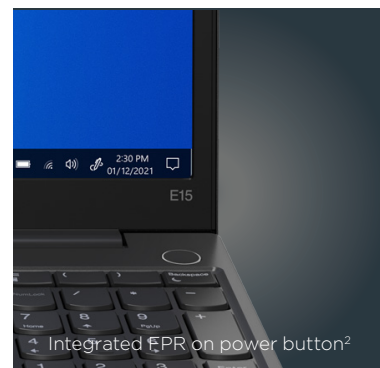

The data and device are safeguarded with multiple security features on the E15 Gen 3. Log in instantly with facial recognition using the IR camera,² or with the FPR integrated² on the power button. Maintain webcam privacy by simply sliding the ThinkShutter camera cover when not in use.
